RACX™ Picture Frame Pallet

\$76.00

RACX™ Picture Frame Pallet Premium Performance at an Affordable Price

Decade's new RACX™ pallet combines strength and economy in a lightweight one-piece design for superior performance at an affordable price.

Fabricated of recycled HDPE plastics, these rackable pallets feature a picture frame bottom with runners on all four sides for stability. They are ideal for use in warehouse racking systems, as well as stack loading, closed loop transport, floor storage and automated material handling applications. In addition, RACX pallets are engineered so that the bottom pallet can handle the full static load when loaded pallets are stacked 2 or more high; and offer unsupported rack capacities up to 2,200 lbs.

Available in a standard size of 48 x 40-inches, RACX pallets may be fitted with optional rubber grommets or lip to keep contents from slipping. Static load capacities are rated to 25,000 lbs., and dynamic loads to 5,000 lbs.
